# DURAN® SUPER DUTY

## REINFORCED RIM FOR INCREASED STABILITY

Life can be tough for laboratory glassware such as beakers, flasks and cylinders. Rough handling and laboratory processes like automated washing can cause damage and breakages. The DURAN® SUPER DUTY products were specially developed to better cope with laboratory life.

The DURAN® SUPER DUTY products are characterized by a higher mechanical strength achieved by reinforcing the rim. As a result of this modification, the impact strength is improved, and the risk of accidental breakage is significantly reduced. The DURAN® SUPER DUTY products increase the safety in the laboratory and help to minimize the risk of injury. The longer life expectancy of the SUPER DUTY products means that they are more economical to use over the long term.

### Benefits

- Higher impact strength due to reinforced rim
- Increased safety in a laboratory due to lower breakage risk
- Uniform wall thickness distribution
- Proven DURAN® properties
- Type I glass / neutral glass as per USP, EP and JP
- Autoclavable / sterilisable
- With Retrace Code (Batch certificate via Internet)
- Easy-to-read scale
- Fired-on, extremely durable printing
- Economical due to the longer life span

### Application note

To avoid breakages due to thermal stress, uniform and slow heating of SUPER DUTY products is recommended.

Product range	DURAN® SUPER DUTY Measuring cylinder	DURAN® SUPER DUTY Beaker		DURAN® SUPER DUTY Erlenmeyer flask	
Borosilicate 3.3 glass body					
Shape	low form, class B, with graduation and hexagonal base	low form, with spout	tall form, with spout	narrow neck	wide neck
Retrace Code	–	yes	yes	yes	yes
